

Marie Stopes International: services and centres

The services on this page are listed alphabetically:

abortion, cervical screening (smear tests & HPV tests), chlamydia tests, contraception, emergency contraception, female sterilisation, menopause check, vasectomy, well woman & well man screening.

Abortion

Which Marie Stopes International Centres do abortion consultations and treatment?

We have a network of Marie Stopes International centres providing women with abortion advice and help across the country.

Before an abortion you would need to have an initial consultation where we can talk to you, explain everything and do a medical assessment. We can also offer this service over the telephone if you prefer a telephone consultation. Ask about this when you call to get more information.

Our local consultation centres and abortion treatment centres are shown below. Take a look for the nearest centre to you.

The centres in blue are our main centres. You can also ask us about all of our centres when you call to make an appointment.

Initial abortion consultation centres:
